

Deaf Culture

When people share a similar set of values, norms, history, and tradition, coupled with a common language, those people constitute a culture.

Is there a Deaf Culture?

The use of the cultural label of being Deaf can be a declaration of personal identity rather than an indicator of hearing ability. American Sign Language unites people with profound hearing loss throughout the United States. Deaf Communities have their own educational institutions, social clubs and athletic organizations. A variety of events, conferences and conventions take place on a regular basis, providing individuals who are deaf a wide variety of options in which to interact with others. In addition, the Deaf Community engages in social and political activities exclusive to the Deaf Community.

The Deaf Community provides a sense of belonging for deaf people who might otherwise feel excluded from hearing culture. A belief commonly shared by Deaf people is that deafness should not be regarded as an impairment or a disability.
